

PearlStreet

POWER INDUSTRY CASE STUDY

OPTIMISING ASSET CARE FOR A LARGE PORTFOLIO OF POWER STATION ASSETS

SERVICES: NDT, Inspection, Engineering & Materials Consulting, Shutdown Planning & Execution

THE PROBLEM

A large power owner required technical assistance to apply asset care techniques to his existing/recently commissioned plant.

THE CHALLENGE

To secure management and technical resources to optimise asset care across the entire asset portfolio.

PEARLSTREET'S INVOLVEMENT

PearlStreet was chosen to deliver Non Destructive Testing (NDT), Inspection, and Engineering & Materials Consulting to all pressure plant during critical inspection periods.

A collaborative agreement was formed with three other service providers to provide a comprehensive and technical capability.

FEATURES

- Ability to execute long term asset strategy
- Ability to standardise common systems across asset portfolio
- Ability to access required technical capability

BENEFITS

- Integrated team delivering continuous improvement
- Innovation and joint benchmarking across asset portfolio
- Sustainable technical capability dedicated to delivering asset owner's strategic objectives
