

PearlStreet

PLANT SHUTDOWN PLANNING & EXECUTION

- Are you optimising the inspection and NDT performed during plant shutdowns or outages?
- Are you delivering your shutdowns in the most efficient and effective way?

WHAT DOES PEARLSTREET DO?

We provide management services for overhaul maintenance and perform inspection and non destructive testing (NDT) activities throughout the process. We help you prioritize and plan work, undertake inspection and NDT and liaise with boilermakers, pipe fabricators and other equipment suppliers to follow-up inspection work.
