

**CBCI Employee wins the South West Regional College of TAFE Annual Fitting and Machining Award.**

The Board and Management team at PearlStreet Energy Services take great pleasure in announcing that Collie Basin Coal Infrastructure employee Darryl Lette has recently won the Annual Fitting and Machining Award at the South West Regional College of TAFE.

This award acknowledges the dedication, hard work and commitment that Darryl has consistently demonstrated throughout his adult apprenticeship. Darryl's achievement is further magnified by the successful completion of the required studies occurring twelve months in advance of the normal completion schedule.

In addition to the considerable individual effort required, awards of this nature are not possible without a solid personal support base and an employer motivated to make available opportunities through which people can realise their full potential.

PearlStreet Energy Services is a privately owned Western Australian company dedicated to the support and continued professional development of its employees.
